Thermo Fisher Scientific is working in partnership with Chicago Public Schools-OSHW/COVID Response and Color Health's technology platform, the information below details your school's upcoming COVID 19 testing date and time.

Your school will begin testing on 10/5/2021 at CLEVELAND from 08:00 AM-09:30 AM CST. We encourage you to communicate within your school community that the testing team will be on site during this day and time.

Scheduling Updates

Thanks for your patience as we are working with a very dynamic schedule during the ramp up of testing multiple CPS schools on a daily basis. In order to be more proactive, we are working towards a standardized weekly testing schedule.

- Please note that we are still finalizing your school's schedule. The time frame that has been selected for your school corresponds to the staff and students registered for testing.
- We do understand that the testing time may be limited currently, as we scale up and additional staff are added we will be able to expand the testing time and/or support with additional staff.
- The goal is for your testing day to remain the same in the following weeks, but time frames could change based on registered participants. We will be providing schools with a consistent day and time that will continue throughout the school year.

How to Register

Registration is a one-time process so once staff and students have registered, they do not have to re-register for future testing needs. Note that there are separate links for staff and students.

- These links are specific to your school, please do not forward them.
